

frederick ottoman. 6 legs

description

Abd's contemporary take on the classic cushioned four-legged bench seat is also available in a six-leg variation that is well-suited for entryways and landings. In both versions, the polished brass legs are handcrafted using sand-cast molding, a technique that expresses itself through slight variations to each finish.

The upholstered cushion, available in four fabric options including tweed and linen blends, is filled with high-quality down feathers.

Made to order and handcrafted in Toronto
